The Islamia University of Bahawalpur

Baghdad-al-Jadeed Campus

Final Year Project Proposal

Program: ☐ **BSSE** ■**BSIT**☐ **BSAI**

Project Title: My Project

Nature of Project: ■**Development** ☐ **Research**

Area of Specialization:

☐ Artificial Intelligence (AI) ☐ Game Development ☐ Internet of Things (IoT)
☐ Machine Learning ☐ Mobile App Development ☐ Blockchain ☐ Data Science and Analytics
■Web Development ☐ Cybersecurity ☐ Image Processing ☐ Desktop Application
☐ Natural Language Processing (NLP) ☐ Other (Specify)______________________________________

Introduction:

The Student Assignment and Deadline Management System is a web-based application designed to help students organize and manage their academic assignments efficiently. The system will allow students to add, view, update, and delete assignments, set due dates and priorities, and track their task completion status. It will also provide a simple dashboard to display pending, completed, and upcoming assignments. The main objective of this project is to improve students' time management, reduce missed deadlines, and make academic task management easier and more organized through a user-friendly interface.

Problem Statement:

Students often struggle to organize their academic assignments, manage multiple deadlines, and keep track of pending and completed tasks.
Without a proper management system, they may forget deadlines, experience poor time management, and find it difficult to prioritize their academic work.
Therefore, a simple web-based system is needed to help students manage their assignments efficiently in one place.

Project Goal / Objectives:

The main goal of this project is to develop a user-friendly web application that helps students organize their academic assignments and manage deadlines effectively.

Objectives:

1. To allow students to add, view, update, and delete assignments.
2. To enable students to set assignment due dates and priorities.
3. To track pending, completed, and overdue assignments.
4. To provide a dashboard for viewing assignment progress and upcoming deadlines.
5. To improve students' time management and reduce missed deadlines.
6. To store and manage assignment information in an organized manner.

Application Architecture / Technology Stack / Tools / Hardware:

Frontend: HTML, CSS, JavaScript
Backend: Python (Flask)
Database: SQLite
Development Tool: Visual Studio Code
Version Control and Hosting: GitHub

Project Group Members:

Sr.# Reg. # Student Name Phone # Signature

(1) Zoha Fatima, Roll# 1102, Section 2M (7TH semester)
